

# How we are Feeding Possibility!

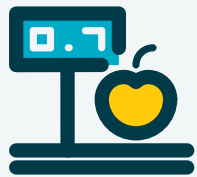

The Feeding Possibility! Grant helps the provincial food bank network improve their resilience by supporting member food banks in their capacity to serve their communities. Four different streams are available to support operational needs, innovative programming, community organizing, and innovation.

## The Fundamentals Stream

The Fundamentals stream is designed to support operational needs, capacity building, or general maintenance of equipment or infrastructure projects up to \$10,000. Last year, we provided...

...which funded **15** projects, that support more than **17,500** people each month through the purchasing of...

**3**

pallet jacks,  
and warehouse  
scales

**350 ft<sup>3</sup>**

of fridge and  
freezer space

**100**

donation  
collection  
drums

**3,400 ft<sup>2</sup>**

food  
forest

“

*It is rewarding to offer fresh, nutritious food to our neighbours. Prior to having the refrigerator it was frustrating to know that our neighbours did not always have access to fresh produce. We are aware of the positive impact nutritious food has on mental and physical health. It is encouraging to provide nutritionally dense food to our Neighbours to help improve overall health and well being.”*

**- Clarington East Food Bank**

“

*We now have two new computers that are not extremely out of date and that can use current software without issues. We are able to work more efficiently by not having to spend time trying to fix old computers or figure out workarounds. Our Volunteer Coordinator and her volunteers have found the new computer a huge help in completing their work in an efficient manner.”*
